Warm Hubs

Warm hubs are community spaces where people can go to stay warm during colder months. Warm hubs are set up by local councils, charities, or community groups. Hubs provide a safe, welcoming environment for those struggling to heat their homes due to rising energy cost. Many warm hubs also offer free or low-cost refreshments, activities, and access to support services. If you're feeling isolated, need support, or just want to get out and about this winter have a look at the warm hubs in your area.
